

Another Strong Earthquake Hits Japan

by Editor - Cleaves Newswire *Thursday, Mar 10 2011, 10:38pm*

international / environment / news report

["The greater portion of Japan must go into the sea." Be advised.]

Another powerful earthquake measuring **8.9** on the scale, just struck off Japan's main island of Honshu. Tokyo was shaken violently for several minutes and a tsunami warning has been issued -- the wave could measure **up to 7 metres**, 10 metres in some coastal areas, according to Japan's tsunami watch and the Tsunami Warning Center, Hawaii!
